DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okamoto et al. (5,012,770). Okamoto et al. discloses the claimed invention except a boss part integrally formed with a throttle body mounting flange. It would have been obvious to make bracket 23 and flange 18 of Okamoto et al integral, held that one piece construction is a matter of obvious engineering choice. *See In re Larson* 340 F.2d 965, 968, 144 USPQ 347, 349 (CCPA 1965)

Regarding claim 2, wherein a portion of said engine block contacting with said boss part is a lateral side of a transmission-mounting flange of a rear cylinder block (12).

Regarding claim 3, wherein the boss part protrudes out (10) at the bottom of said throttle body mounting flange (18) toward the cylinder block (12).

Response to Arguments

Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.
